

Appl. No.: 09/944,165  
Amendment dated August 26, 2005  
Reply to Office Action of June 24, 2005

**Amendments to the Specification**

After paragraph [18], please insert the following new paragraph:

—Figure 6 illustrates a method according to one or more aspects of the invention.—

Please amend paragraph [35] as follows:

— Zoom input control 201 receives input from a user and sends the user input to the zoom circuit 511. Zoom circuit 511 modifies the zoom level of the display 103 (FIG. 6, step 607) responsive to the received input (FIG. 6, step 605) by sending zoom information to the display memory 517. Pan input control 203 receives input from a user (FIG. 6, step 601) and sends the user input to the pan circuit 513. Pan circuit 513 pans content on the display 103 (FIG. 6, step 603) responsive to the received input by sending pan information to the display memory 517.—
